MEMORANDUM FOR: Deputy Director (Administration)

SUBJECT : Committees

1. The Federal Personnel Council is a creation of the Civil Service Commission. It is comprised of selected personnel directors of Government agencies and the President's Advisor on Personnel Matters. It meets twice monthly and recommends personnel policy normally to the Civil Service Commission. This Council is often called upon for recommendations also to the Bureau of the Budget and committees of Congress along contemplated personnel legislation. Our previous Personnel Director was a member. Upon his departure, General Davison nominated Mr. Meloon to replace him.

2. The Statistical Security Committee is a creation of the Bureau of the Budget based on a Presidential Executive Order. Its members are representatives from the Departments of Justice, State, and Defense, and from CIA. Its primary function is to review overt statistical releases contemplated by agencies of the U. S. Government and to recommend the advisability of publishing releases based on national security considerations. [REDACTED] of I&S is the CIA member. As a matter of practice, he consults normally with ORR on the CIA position in this Committee.

3. The Policy Committee on Printing is the group with membership from CIA, State, and Joint Committee on Printing which is supposed to supervise and control the activities of the GPO Printing Plant in South Building.

4. The Emergency Planning Committee is the Committee sponsored by NSRB of which Mr. Peel and I are members. I do not believe that you need any special indoctrination on this one.
